

STANDRAD CORE CHUCK CHARACTERISTICS

- Can be tailor-made to your particular requirements, from 3" to 16".
- The gripping force is applied from the beginning on the core and it is constant during the work. You can use it for winding or unwinding applications.
- The standard lugs give a perfect gripping force on all production phases allowing the re-use of the core 2/3 times.
- Very low maintenance required. There are no internal parts that can collapse due to dust.
- Flanges can be adapted to any roll-stand.
